嘉宾简介

Vladimir Dotsenko is a professor at the University of Strasbourg and currently a Distinguished Visiting Professor at the Chinese Academy of Sciences. His research interests include operad theory, homotopical and homological algebra, category theory, and symbolic computation methods such as Gröbner bases and rewriting systems. His work has appeared in Inventiones Mathematicae, Duke Mathematical Journal, Compositio Mathematica, Communications in Mathematical Physics and the Journal of the European Mathematical Society. He has coauthored two monographs: Algebraic Operads: An Algorithmic Companion and Maurer–Cartan Methods in Deformation Theory: The Twisting Procedure. He was elected a Fellow of Trinity College Dublin in 2016 and was a Junior Member of the Institut universitaire de France from 2021 to 2026.
